Rooted in our Strengths: Equity, Excellence Relevance

## Student Support and Development

- Cultural and linguistic responsiveness
- Equitable access to grade level standards for all
- Instructional scaffolding
- Structured Literacy development to support content development
- Preparation for college and career

## Teacher Support and Development

- Professional learning to support student development
- Collaborative practices
- Balanced Assessment Resources
- Support with the use of highly effective instructional strategies in lesson planning
- Support finding and using High Quality Instructional Materials

# Research

Students have big, clear plans for college and career.

Most students do what they're asked in school-but are still not ready to succeed after school.

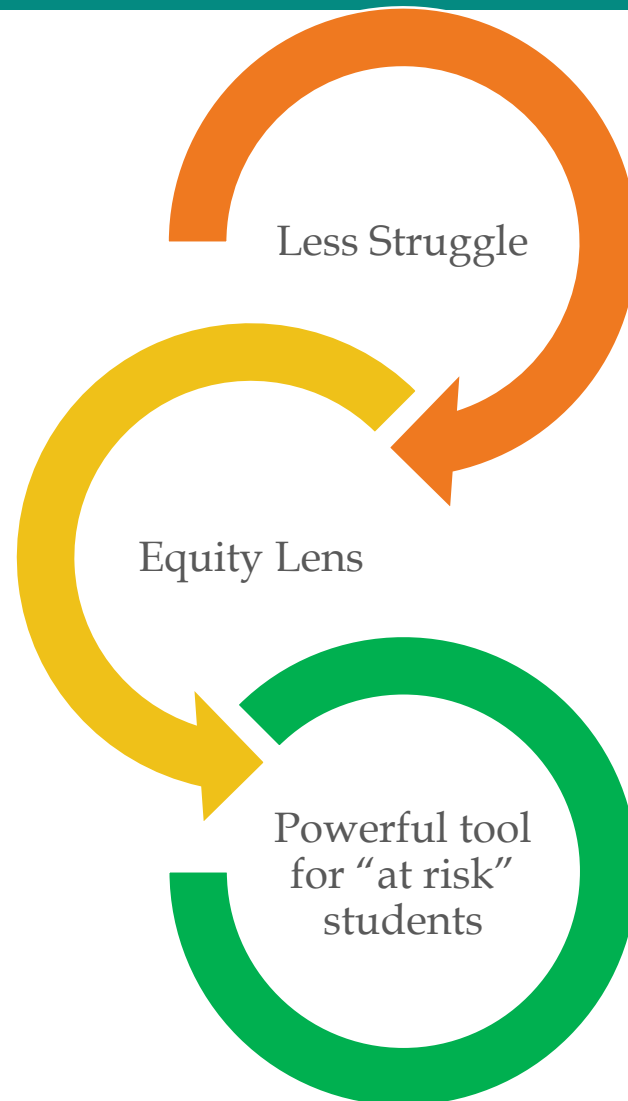

Students spend most of their time in school **without access** to four key resources:

- grade appropriate assignments
- strong instruction
- deep engagement
- teachers with high expectations

Students of color, those from low-income families, ELL, and SWD (mild to moderate) have even less access to these resources than their peers.

Greater access to the four resources can and does improve student achievement-particularly for students who start the school year behind.

# Research Regarding Acceleration

# Mindset Shift

## Remediation

- Instruction focused on repetition and drill on very specific skills
- Instruction is separate from the current grade level content
- Instruction is connected to skills from previous years
- Focus is below grade level rather than at grade level

## Acceleration

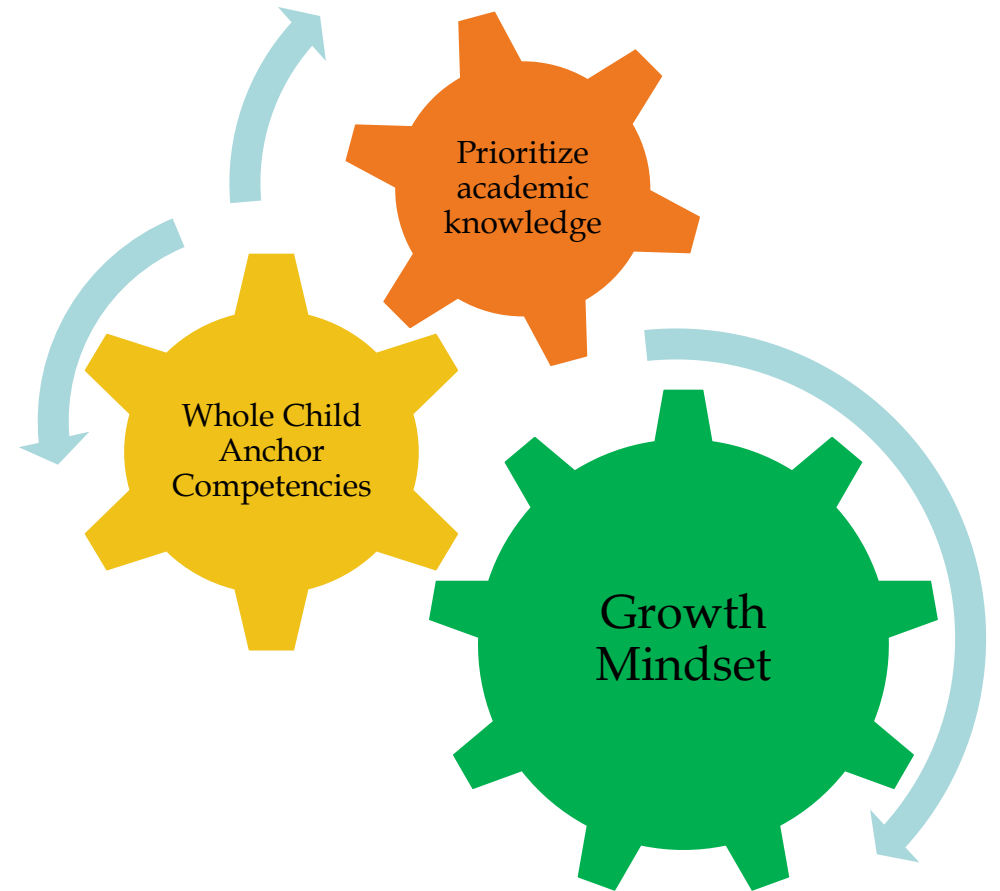

- Instruction is targeted to supporting students with on-grade level content
- Instruction targets what students need at the current time for grade level std
- Instruction prepares students for new learning with a strong pre-teach related to on grade-level standard
- Missing skills and concepts from previous grade levels are addressed in the context of on-grade level learning

# Operational Definition of Accelerated Learning

## Grade Level Standard is the Floor, Not the Ceiling

An instructional framework that assumes **all students** engage with grade-level academic standards. In order for accelerated learning to work, three foundational tenets are critical:

Accelerated learning enables educators to connect unfinished learning with new ideas and new information, all while engaging with grade-level content and celebrating student cultural wealth.

# Focus Areas For Accelerating Learning

1. All students and families have the resources they need to meaningfully engage in school, whether it's in person or not.

2. All students feel like they belong in their school experience.

3. All students and families are treated as authentic partners.

**SEL  
and  
Engagement**

4. All students have access to grade-appropriate assignments focused on priority content.

5. All students have access to strong instruction that addresses any gaps in prior learning they have within the context of grade-appropriate assignments focused on priority content.

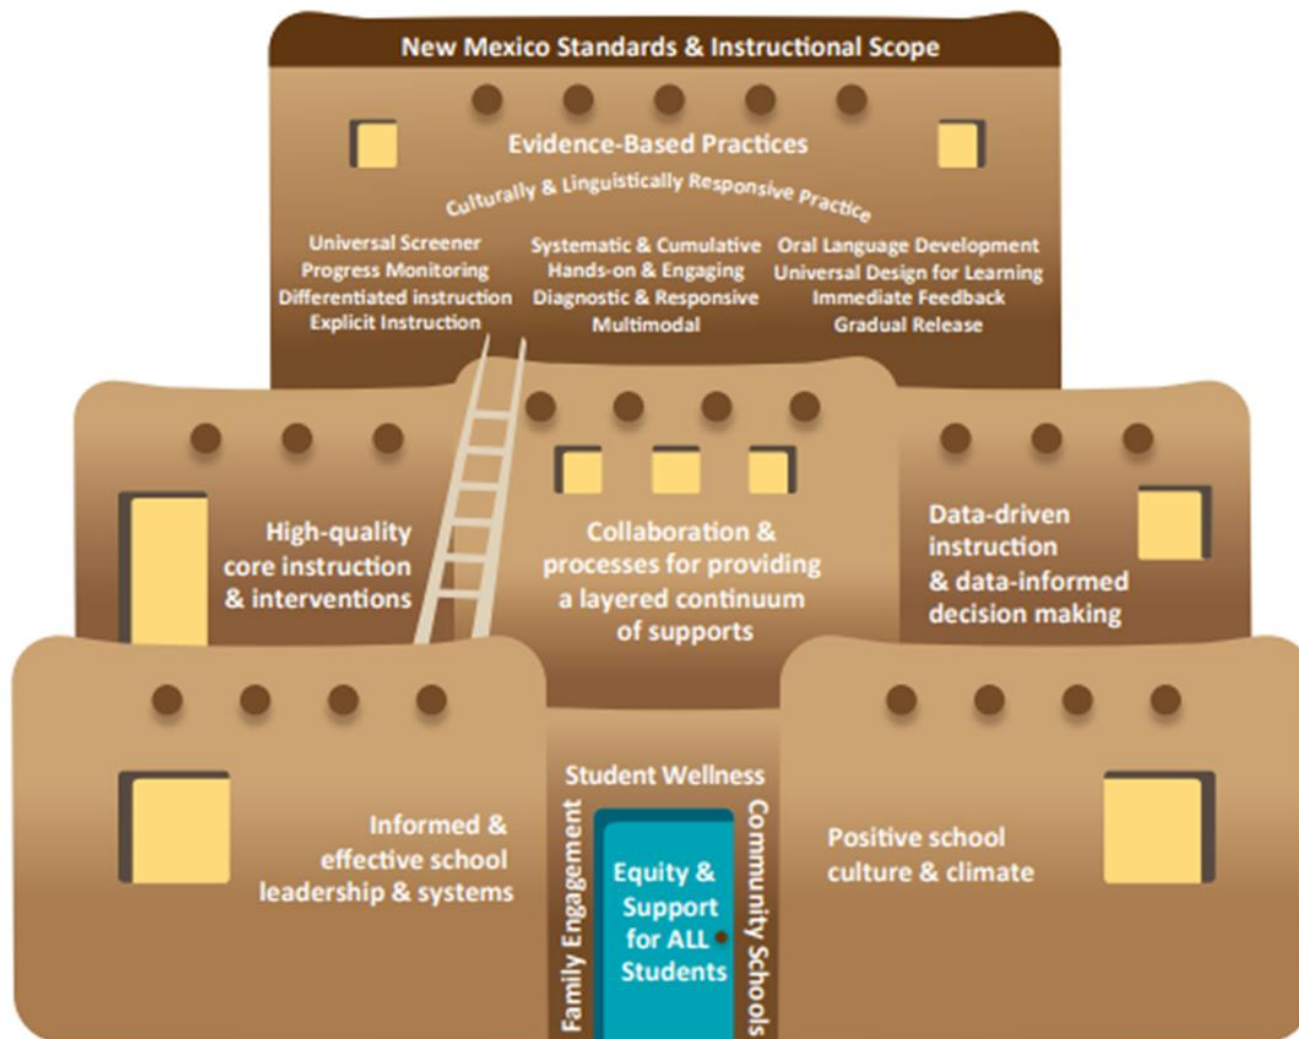

6. All students are demonstrating mastery of grade-level content.
