McCurdy Charter School School-specific Goal Amendment Request
June 27, 2025, Public Education Commission (PEC) Meeting
Charter Schools Division (CSD) Analysis

Request: McCurdy Charter School requests PEC approval to amend school-specific goals 1 and 2 (for English language arts and mathematics, respectively) to allow students to show growth on the Galileo short-cycle assessment between any two test windows.

Analysis: As currently written, students can show growth only from beginning of year (BOY) to end of year (EOY). The amendment would allow students to show growth between BOY and middle of year (MOY) or between MOY and EOY as well.

The 2024 PEC Performance Framework allows schools that select Academic Option 2 to demonstrate growth between any two testing windows (BOY to MOY, MOY to EOY, or BOY to EOY). The proposed change in McCurdy Charter School's goals brings these goals into alignment with the assessment norms and practices embodied in the PEC Performance Framework.

Recommendation: CSD recommends approving the change requested.
