NM STEM Ready! Science Resources

Welcome!

Equitable Science for all New Mexico students! Our state must work together with a common targeted purpose in providing all students the opportunity to continuously engage in science practices (Science and Engineering Practices, Disciplinary Core Ideas, and Cross Cutting Concepts) from Pre-K to twelfth grade and beyond. They will develop skills needed for their future endeavors and economic outcomes. Our New Mexico students deserve a fighting chance. Equitable Science for All New Mexico Students addresses the systemic inequities of science education in New Mexico. It must be continuously supported and funded annually to make measurable changes that will ultimately value "El Corazón de Nuevo México" our students and families who live here.
